

```
classDiagram
    class Task["mammut::task::Task"]
    class ProcessHandler["mammut::task::ProcessHandler"]
    ProcessHandler --|> Task
```

The diagram shows two classes. The top class, `mammut::task::Task`, is enclosed in a dashed rectangular border. The bottom class, `mammut::task::ProcessHandler`, is enclosed in a solid rectangular border. A solid vertical arrow points from the top edge of the `ProcessHandler` box to the bottom dashed edge of the `Task` box, indicating that `ProcessHandler` inherits from `Task`.

`mammut::task::Task`

`mammut::task::ProcessHandler`
