

mammut::task::Task

```
classDiagram
    class Task
    class ProcessHandler
    class ThreadHandler
    ProcessHandler --|> Task
    ThreadHandler --|> Task
```

A UML class diagram showing inheritance. At the top is a box labeled 'mammut::task::Task'. Below it are two boxes: 'mammut::task::ProcessHandler' on the left and 'mammut::task::ThreadHandler' on the right. A horizontal line connects the two bottom boxes, with a vertical line extending upwards from its center to the bottom of the 'mammut::task::Task' box, ending in an arrowhead. This indicates that both 'ProcessHandler' and 'ThreadHandler' inherit from 'Task'.
