

```
classDiagram
    class Task["mammut::task::Task"]
    class ProcessHandler["mammut::task::ProcessHandler"]
    ProcessHandler --|> Task
```

The diagram illustrates a class hierarchy. At the top, a dashed rectangular box contains the text `mammut::task::Task`. Below this box, a solid rectangular box contains the text `mammut::task::ProcessHandler`. A vertical arrow points from the top edge of the `ProcessHandler` box to the bottom edge of the `Task` box, indicating that `ProcessHandler` inherits from `Task`.

`mammut::task::Task`

`mammut::task::ProcessHandler`
