

mammut::task::Task

```
classDiagram
    class Task
    class ProcessHandler
    class ThreadHandler
    ProcessHandler --|> Task
    ThreadHandler --|> Task
```

The diagram illustrates a class hierarchy. At the top is the 'mammut::task::Task' class. Below it are two subclasses: 'mammut::task::ProcessHandler' on the left and 'mammut::task::ThreadHandler' on the right. Both subclasses have a solid line with an open arrow pointing upwards to the 'Task' class, indicating inheritance.
